

# A NEW DIGITAL FOUNDATION FOR LEAN MANUFACTURING

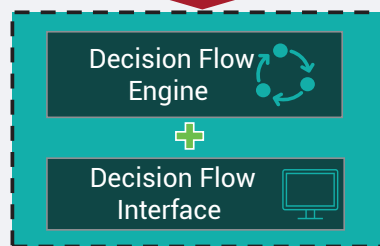

Decision Flow, a powerful new software solution built for complex manufacturing environments, seamlessly integrates the fundamentals of lean production into daily operations and material management processes. Picking up where traditional ERP leaves off, Decision Flow offers side-by-side comparisons of actual and optimal conditions throughout the supply chain, bringing new levels of visibility that help eliminate excess inventory, reduce working capital and get products to market on time.

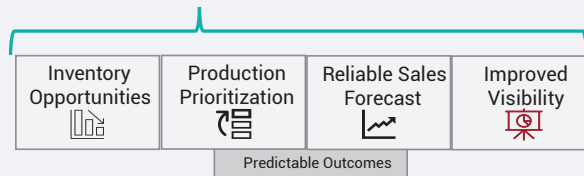

## FULL PROCESS SOLUTION – MORE THAN SOFTWARE

- Fully integrated tools and training that maximize effectiveness
- Direct and ongoing "should state/actual state" comparisons
- Real-time production planning, management, & execution
- Ideal for high mix/low volume manufacturing environments
- New and powerful solution to identify and manage constraints
- Exposes material exceptions and increases throughput visibility
- Integrates easily with all ERP solutions

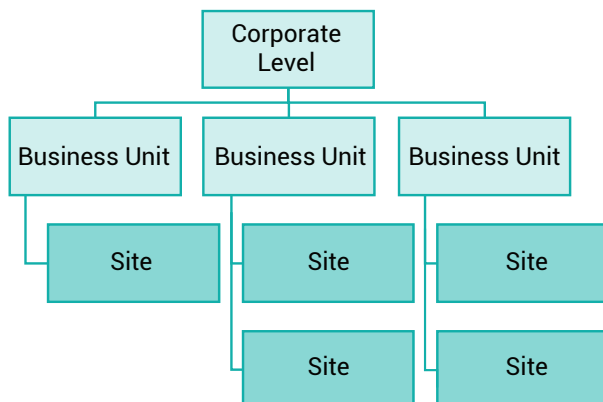

Data Sources  
(MRP, SFC, etc.)

- Establishes WIP & Inv Targets Throughout the Flow
- Identifies Gaps
- Simplifies Decisions
- Enables Standard Work
- Focuses Team on Flow
- Highly Automated

## FULLY DEPLOYABLE ON PREMISE OR HOSTED SOLUTION

## RECENT RESULTS

**Increased productivity** by 35%, for the material planning and program management functions

**Reduced Inventory** from recent deployments in Aerospace factories.

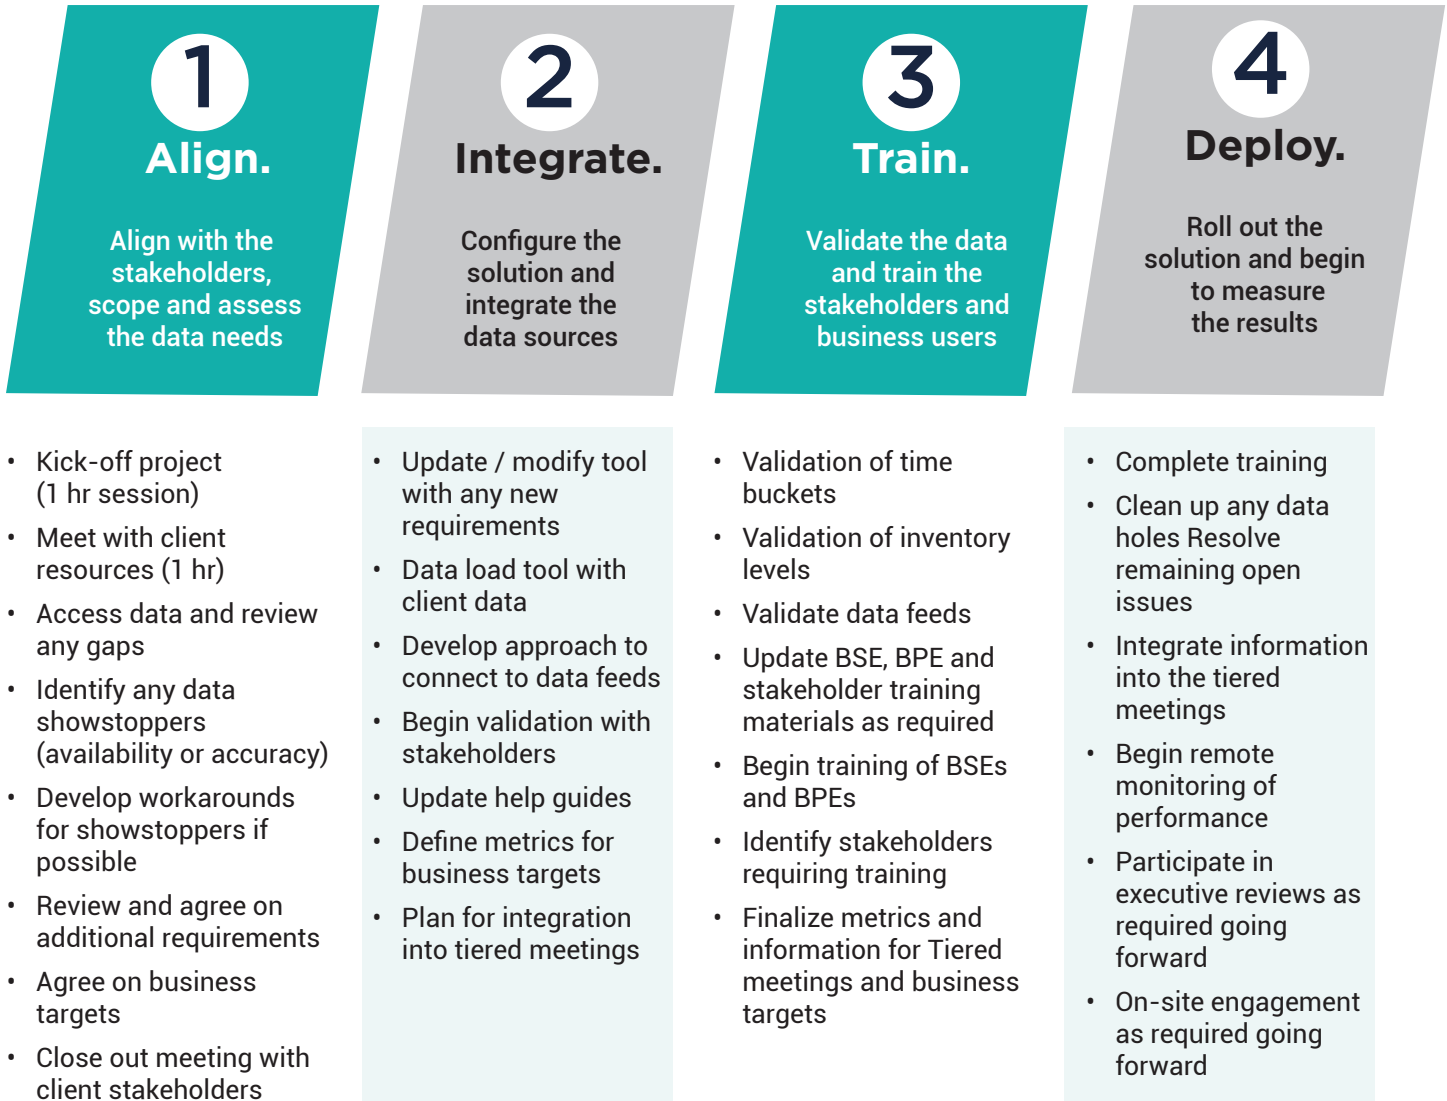

**Reduced cycle time in manufacturing** – effective management of constraints

## MEASURABLE RESULTS IN AN ACCELERATED TIMEFRAME

We deploy Decision Flow to achieve measurable results in an accelerated timeframe – without interrupting your business productivity. Working closely with management teams, we transfer our knowledge to ensure smooth implementation and support.

### A 4-STEP APPROACH THAT GETS RESULTS

## ABOUT DECISION FLOW

U.S.-based and headquartered in New Jersey, Decision Flow is a leading provider of operations execution software for the Aerospace and Industrial markets. Our proprietary software solution optimizes flow throughout the value stream, minimizing inventory levels while increasing product output. Our industry expertise, combined with advanced analytics technology, offers our customers new levels of efficiency and an unparalleled competitive advantage.
